Objective

Innovative and detail-oriented IoT Engineer with a strong foundation in Computer Science, AI/ML, and UI/UX Design. Experienced in developing smart systems, real-time dashboards, and user-centric applications. Skilled in Python, IoT architectures, and Figma, with a passion for building scalable, efficient, and user-friendly solutions.

Education

Paavai Engineering College , Computer Science Engineering(Internet of Things)	Nov 2022 – May 2026
- CGPA: 7.95/10.0 Coursework: IoT, AI/ML, Cloud, Embedded Systems	
Govt.Higher Secondary School , HSC	June 2021 – May 2022
Percentage: 72	
Govt.High School , SSLC	Jun 2019 – May 2020
Percentage: 78	

Skills

Programming and Development

- Python, Java, SQL
- Basic Data Structures and Problem Solving

IoT and Embedded Systems

- Arduino, Raspberri Pi
- Sensor integration and realtime monitoring
- IoT system design and architecture

UI/UX Design

- User Research, Wireframing, Prototyping
- Usability and User centered design principles

Data and AI/ML

- Data Preprocessing and Analysis
- Machine Learning Fundamentals
- Model Evaluation Techniques

Tools and Technologies

- Figma, Github, Power Bi
- Arduino IDE
- Basic Web Technologies

Work Experience

UI/UX Design- INTERN	Feb – May 2025
- Designed interactive wireframes and high-fidelity prototypes using Figma for web and mobile applications - Conducted user research and applied design thinking methodologies to improve usability - Improved user experience by identifying pain points and optimizing navigation flow Collaborated with team members to deliver user-centric design solutions	

Arduino Robotics- WORKSHOP

Dec 2023

- Basics of arduino platforms and libraries
- Implementation of Robotic car using Arduino

IBM SkillBuild (Virtual)- INTERN

Nov – Dec 2024

- Developed machine learning models using Python for predictive analysis
- Performed data preprocessing, feature selection, and model evaluation
- Applied analytical thinking to solve real-world business problems

Projects

Smart and Sustainable waste Management - IoT

- Developed an IoT-based smart bin system using NodeMCU and sensors
- Designed a real-time monitoring dashboard for waste level tracking
- Integrated GSM module for location tracking and alerts
- Improved efficiency of waste collection using smart notifications

E-commerce App - UI/UX Design

- Designed user-friendly interfaces and improved user journey
- Created wireframes and prototypes using Figma
- Enhanced user engagement through better UI design

Activities

- Actively participated in IoT and robotics workshops, gaining practical exposure to embedded systems
- Contributed to the development of real-time IoT solutions through academic projects
- Applied design thinking principles in UI/UX projects to enhance user experience
- Collaborated effectively in team environments to deliver project outcomes within deadlines

Certification

IBM Skillbuild - AI/ML

- Completed a virtual internship focused on Artificial Intelligence and Machine Learning, where I developed predictive models using Python and gained hands-on experience in data preprocessing, model building, and evaluation techniques.

UI/UX Design

- Completed a UI/UX design certification program, gaining practical experience in user research, wireframing, prototyping, and designing user-centered interfaces using Figma.

Java Essentials - Udemy

- Gained a strong foundation in Java programming, including object-oriented concepts, control structures, and basic data structures, with practical implementation through coding exercises.
